Organization

easy to lose an ID card

Makes it easier for schools, universities, and businesses to track their staff

Temporary guest id for users

displays your current balance

Pull up student ID, network ID (specific to USC), save passwords and could show grade level/classification. Students sometimes get ID and username confused

Availability

App available for ios and Android devices

Can also be used on computer's via website

Can be used both online and offline

Availability 24/7

share with a friend/send money

Location

Phones can be tracked

places that accept the card

Much harder to find a lost card than a lost phone

Students can see what locations they've swiped into at what time. useful for finding other lost items

directions to location

Track a lost card with the app

Can see current location

Saving

More secure payment process for meal plans

costs money to replace a lost ID card

Students can use Id's for other apps partnered with the company or school

save previous purchases

subscription can be canceled at any time

easy to break/damage an ID card

saves time scanning your phone instead of taking your card out

order items ahead of time

Security

hides your data and information

harder for someone to steal it from you

Can use a temporary card on your phone if your actual card is damaged

Can shut card off if it is lost or stolen

Helps users classify security access
